Sustainable Sovereign Bond

The Mexican Government is committed to broaden its investor base through the issuance of sustainable finance instruments, aligned with the Sustainable Development Goals (SDGs).

In Sep-20^{1/}, Mexico became the first country in the world to issue a sustainable sovereign bond^{2/} that were linked to the SDGs, for an amount of EUR 750 million. As part of Mexico's Sustainable Financing Strategy, the Treasury issued a new benchmark sustainable bond denominated in dollars maturing in 2053. This is the ninth sustainable bond issued in international financial markets^{3/}.

Mexico's innovative instruments and debt management have been recognized internationally:

- ▶ Moody's assigned an SQS1 sustainability quality score (excellent) to the Government of Mexico's SDG Sovereign Bond Framework^{4/}.
- ▶ In April 2023, Mexico received two international awards for its public debt management and its vision of sustainable development. A total of 22 has been awarded in the last five years^{5/}.
- ▶ In July 2023, Mexico carried out the initial issuance of the BonoS, a sustainable bond in local currency. This issuance consolidates Mexico as the country with the largest ESG corporate bond market in Latin America^{6/}.
