Debt Issuance by Banco de México

Bondes F:

During the first quarter of 2022, Banco de México will not be auctioning Bondes F on a weekly basis.

Cetes:

During the first quarter of 2022, Banco de México will not renew any Cetes maturities for the aforementioned period; thus, no extraordinary auctions of said instruments will be announced.

Debt Exchange Auctions:

Alternatively, Banco de México, acting on its own behalf, could execute debt exchange auctions of Government securities during the first quarter of 2022. The purpose of these operations would be to smooth out the monetary effect of maturing Government securities and thus improve the efficiency of liquidity operations that the Central Bank carries out in the money market on a daily basis. The details of these auctions would be specified in each offering announcement. These debt exchange auctions would also be subject to financial markets conditions.

Banco de México would carry out these operations in compliance with the provisions set out by the law, and in coordination with the Ministry of Finance.

These actions are neutral from the standpoint of Banco de México's monetary policy stance and do not have implications on the Overnight Interbank Interest Rate.
