Government Securities Auction Calendar

Important Aspects

The most important aspects of the government's securities issuance strategy for the third quarter of 2012 are:

- ❑ The Federal Government will continue using the mechanism, implemented during the first quarter of the year, to determine the amount to be issued of the 28-day and 91-day Cetes. This mechanism consists on announcing each quarter the average weekly amount to be issued; in this way, the amount to be issued each week of these instruments may be more or less than the average amount announced; with the restriction that the minimum amount to be issued will be 50% of the average weekly amount announced. Even though the weekly amounts to be issued could change, the total amount to auction during the quarter will be fixed and equal to the average weekly amount announced times the total number of weeks in the quarter.
- ❑ The amount of the 182-day Cetes to be issued at the primary auction is increased, in comparison to the previous quarter, by 500 million pesos, to reach an amount of 9,000 million pesos every week.
