

Public Finance and Public Debt Report, July 2005

The public finances and public debt preliminary results up to July 2005 were released today.

The main results for July are the following:

- The public sector posted a Ps. 20.7 billion surplus, which is in line with the fiscal deficit authorized by Congress for 2005 as a whole.
- The primary balance, defined as total revenues minus non-interest expenditures, posted a Ps. 44.3 billion surplus.
- Budgetary revenues grew 8.1 per cent in real annual terms. The increase was due mainly to non-oil tax revenues (11.2 per cent), to oil-related revenues (4.2 per cent), and to revenue from public entities other than PEMEX (2.8 per cent).
- Net budgetary expenditures were 9.5 per cent lower in real terms than in the same month of 2004. This is mainly due to fixed-rate bond coupon payments which, this year, were made in June and not in July as in 2004.
- The Federal Government's domestic debt net balance was Ps. 10.2 billion higher than in June 2005 and the external debt's net balance fell US\$ 3.2 billion in the same period.

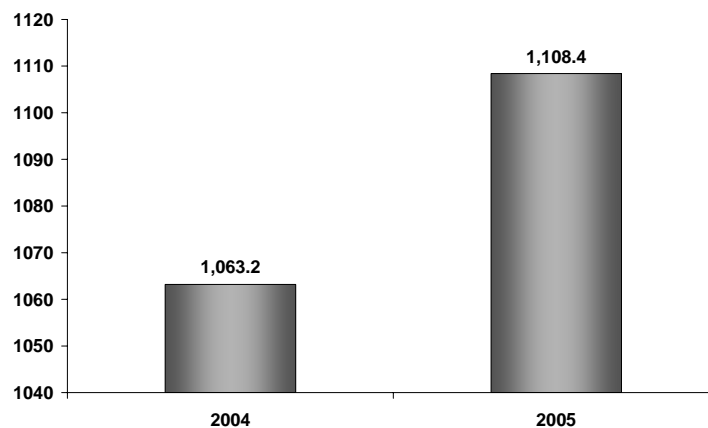

1. Public Sector Balance in January-July 2005

- The accumulated public sector surplus in the January-July period was Ps. 61.8 billion, Ps. 4.8 billion higher than that registered in the same period a year earlier.
- The accumulated primary balance posted a surplus of Ps. 197.9 billion, which is 3.7 per cent higher in real terms than that posted in January-July of 2004.

1.1 Public Sector Budgetary Revenues in January-July 2005

- The public sector's budgetary revenues accumulated in this period were Ps. 1,108.4 billion. This amount is 4.3 per cent higher in real terms than that for the same period of 2004. The annual change is explained by the following:
 - Non-oil tax revenues amounted to Ps. 482.0 billion, 5.1 per cent higher in real terms than in the same period of the previous year. VAT and income tax collection exceeded the figures observed a year earlier by 7.4 and 4.1 per cent in real terms, respectively.
 - Oil-related revenues, which include PEMEX's own revenues, royalties and fees, and the excise tax collection on gasoline and diesel, totaled Ps. 391.3 billion, 6.5 per cent higher in real terms than that registered a year earlier.
 - Non-tax non-oil revenues were Ps. 37.8 billion. This amount is 38.3 per cent lower than in the same period of 2004. The reduction in the annual comparison is due to the higher non-recurring revenues obtained last year, mainly from income associated to the recovery of the Brady bond's collateral (Ps. 13.9 billion) and Banxico's operational surplus (Ps. 15.0 billion). Virtually no revenue has been obtained from these sources in 2005.

Budgetary Revenues
January-July
 (Billions of 2005 pesos)

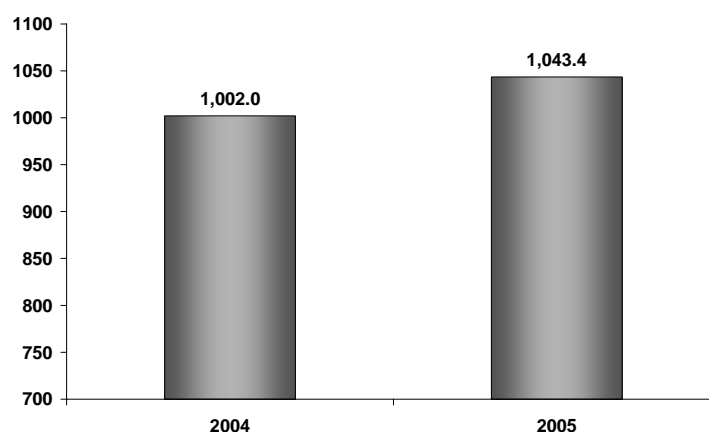

- Revenues of public entities other than PEMEX were Ps. 197.4 billion in 2005, up to the end of July, 12.1 per cent higher in real annual terms with respect to the same period a year earlier.

1.2. Net Budgetary Public Sector Expenditures during January-July 2005

- Net budgetary expenditures of the public sector totaled Ps. 1,043.4 billion in the first seven months of the year. This amount is 4.1 per cent higher in real terms than that observed a year earlier.
- Paid programmable expenditures amounted to Ps. 736.2 billion, 6.0 per cent higher in real annual terms than that registered in the same period a year earlier. This increase is the result of larger social security and energy sector expenses as compared to the first seven months of 2004.

Net Budgetary Expenditures January-July (Billions of 2005 pesos)

- Federalized spending, which includes revenue sharing to States and Municipalities, as well as resources transferred to these entities (*Ramo 33*), provisions for basic, traditional, technical and adult education (*Ramo 25*), and the resources directed towards the financial strengthening of States through PAFEF (*Ramo 39*), registered an increase of 7.1 per cent in real annual terms.
 - Revenue sharing to States and Municipalities was Ps. 172.5 billion, and increased 9.8 per cent in real annual terms.
 - Total resources through *Ramo 25*, *Ramo 33* and *Ramo 39* increased 4.9 per cent in real terms.
- The Public Sector's financing costs during January-July 2005 totaled Ps. 127.4 billion. This amount was 4.6 per cent higher in real terms than that registered in the same period a year earlier.

2. Public Debt Update

- The Federal Government's domestic debt's net balance was Ps. 1,093.7 billion at the end of July 2005. This was Ps. 63.7 billion higher than the balance registered at the end of 2004. This is due to net borrowings of Ps. 75.1 billion, adjustments to the inflation-indexed debt for Ps. 1.8 billion, and an increase in the Federal Government's financial assets of Ps. 13.2 billion.
- At the end of July 2005 the external debt's net balance was US\$ 70.4 billion, US\$ 7.6 billion lower than in December 31st 2004. The decrease is due to net indebtedness of US\$ 3.2 billion, downward accounting adjustments for US\$ 0.7 billion, and an increase of the financial assets abroad of US\$ 3.7 billion.
- It should be pointed out that in July the Federal Government obtained the resources in foreign currency to cover all the external market debt payments due in 2006 and 2007 through the purchase of US dollars from Banco de México. This operation is in accordance to the general debt management strategy, outlined in the National Program to Finance Development 2002-2006 (PRONAFIDE), which intends to reduce the share of external debt in the Federal Government's total debt. It is also congruent with the external and domestic debt indebtedness ceilings approved by Congress for this year.

More details on Public Finance and Public Debt statistics can be obtained in the Ministry of Finance's web page at:
