

PUBLIC FINANCE AND PUBLIC DEBT REPORT, JULY 2009

The public finance and public debt preliminary results as of July 2009 were released today.

The main results for the January-July period are the following:

- **The public sector posted a Ps. 143.9 billion deficit. If PEMEX's investment is excluded and the share of expected revenues from the oil hedge at current valuation corresponding to the January-July period is included, the public balance would register a Ps. 40.0 billion surplus in July 2009, result consistent with the target of a balanced budget established for the year once physical investment by PEMEX is excluded.**
- **Budgetary revenues decreased by 8.0 percent in real annual terms with respect to the same period of last year, due mainly to lower revenues from oil related activities and non-oil tax revenues, which decreased 19.0 and 13.6 percent, respectively, in real annual terms and which were partially compensated by higher non-tax revenues. By adjusting oil revenues with the corresponding revenues from the oil hedge for the period, a real decrease of 4.3 percent in budgetary revenues would be observed.**
- **Programmable expenditures increased by 15.2 percent in real annual terms with respect to the January-July period of the previous year. Worth noting is the increase in the expenditures of Federal Government ministries by 19.1 percent and, within, the higher resources for agricultural activities, social development, public and national security, as well as investment in infrastructure. Physical investment increased 74.8 percent in real terms in the January-July period of 2009 compared to the same period of the previous year and 21.0 percent once physical investment by PEMEX is excluded.**
- **Federalized expenditures decreased by 11.2 percent in real annual terms with respect to the January-July period of 2008, mainly due to the decrease in federal contributions as a result of a lower federal shareable tax collection.**
- **The public sector's net domestic debt increased by Ps. 214.6 billion while its net external debt increased by US\$ 5.5 billion, both with respect to December 2008. The level of indebtedness is consistent with the authorized deficit for 2009.**

Evolution of the Public Finances during the January-July period

As of July 2009, the public sector's balance posted a deficit of Ps. 143.9 billion.¹ The primary balance posted a Ps. 12.0 billion surplus. If PEMEX's investment in 2009 is excluded and the corresponding revenues for the January-July period from the oil hedge, that will materialize in November, are considered, the public sector's balance would register a Ps. 40.0 billion surplus. These results are consistent with the target of a balanced budget established for the year once physical investment by PEMEX is excluded and the Ps. 85.0 billion expenditure adjustment is included.²

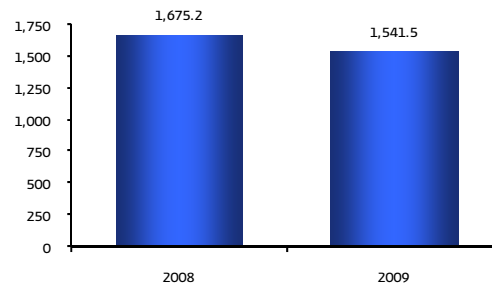

Public Sector Budgetary Revenues during the January-July period

The public sector's budgetary revenues were Ps. 1,541.5 billion, amount which is 8.0 percent lower in real terms than the one registered during the same period of the previous year. If the Ps. 61.2 billion revenues from the oil hedge for the January-July period, that will be observed in November, are included, budgetary revenues would be Ps. 1,602.7 billion, amount 4.3 percent lower in real terms with respect to the same period of last year. The evolution of the main components of budgetary revenues was the following:

¹ In compliance with the Transitory Article Four of the Decree to addition and reform various provisions of the Federal Budget and Fiscal Responsibility Law and the Article 1 of the Federation's Revenues Law for 2009, the liabilities of long term productive infrastructure projects (PIDIREGAS) were converted, in an exceptional manner, into PEMEX's direct public debt with flows by Ps. 896.0 billion. In addition, PEMEX's payable accounts with financial vehicles were registered and settled by Ps. 51.0 billion and a portion of the liabilities were amortized by Ps. 350.5 billion. The information presented in this report excludes the effect of this conversion because their inclusion would complicate the evaluation of public finance results throughout the year.

² See press release 040/2009

**BUDGETARY REVENUES,
JANUARY - JULY
(Billion pesos of 2009)**

- Non-oil tax revenues were Ps. 672.3 billion, amount 13.6 percent lower in real terms than that observed during the January-July period of the previous year. VAT, import, Income (which includes the Unique Rate Corporate Tax and the Tax on Cash Deposits) and Excise taxes collection posted decreases of 20.1, 17.5, 10.3 and 9.0 percent, respectively, due to the lower dynamism of economic activity.
- Oil related revenues (which include PEMEX's own revenues, royalties and fees, excise tax collection on gasoline and diesel, and the tax on oil returns) totaled Ps. 467.6 billion, amount that is 19.0 percent lower in real terms than that registered in the same period of 2008. This result is explained by the reduction in the price of Mexican oil exports by 50.7 percent (45.5 dpb compared with 92.2 dpb observed in the same period of last year), and the decline in the oil production and export platforms by 7.5 and 14.4 percent, respectively. This was partially offset by the exchange rate depreciation of 22.1 percent with respect to the same period of the previous year.
- Revenues of public entities under direct budgetary control other than PEMEX totaled Ps. 236.3 billion, which

represents a decrease of 8.9 percent with respect to those registered in the same period of the previous year. This is mainly due to lower energy sales of CFE and lower IMSS quotas.

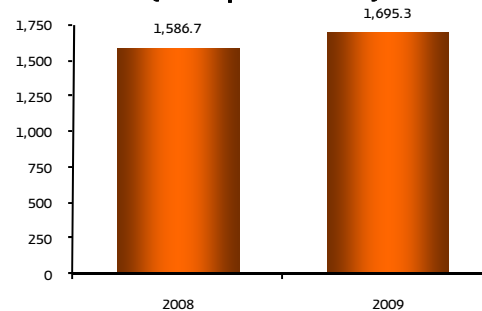

- Non-tax non-oil revenues were Ps. 165.2 billion. Worth highlighting are the revenues by Ps. 95.0 billion associated with royalties due to Banco de Mexico's operation remnant for the 2008 fiscal year.

Net Budgetary Public Sector Expenditures during the January-July period

During the first seven months of the year, the net budgetary expenditures of the public sector totaled Ps. 1,695.3 billion, amount 6.8 percent higher in real terms than the one observed in the same period of 2008.

Paid programmable expenditures totaled Ps. 1,323.6 billion, which is 15.2 percent higher in real terms than the one observed in the same period of the previous year. Worth noting is the increase in the expenditures of Federal Government ministries by 19.1 percent. Higher expenditures were channeled to agricultural development and social development programs such as education, health, urbanization, housing and regional development, to public and national security, as well as investment in the energy sector, health, communications and transport, environment, science and technology and regional infrastructure. Physical investment increased 74.8 percent in real terms and 21.0 percent in real terms once physical investment by PEMEX is excluded.

**BUDGETARY NET EXPENDITURES,
JANUARY - JULY
(Billion pesos of 2009)**

Federalized expenditures, which include shared revenues allocated to Federal Entities and Municipalities, as well as resources transferred to these entities through wage and economic provisions, decentralization agreements and reallocations decreased 11.2 percent in real terms. Shared revenues decreased by 23.7 percent in real terms, as a result of a decrease of 24.7 percent in real terms in shareable tax collection. The rest of the resources distributed to Federal Entities and Municipalities decreased 0.9 percent in real annual terms. It is important to note that in July the federal entities received resources by Ps. 11.3 billion from the Stabilization Fund for the Revenues of Federal Entities (FEIEF) to compensate for the lower federal shareable revenues.

The Public Sector's financial cost was Ps. 155.4 billion, amount 13.6 percent higher in real terms than the one registered in the same period of last year, due in part to the depreciation of the exchange rate.

Balance of the Public Debt to July

At the end of July, the Federal Government's net domestic debt was Ps. 2,499.4 billion, amount that is Ps. 166.6 billion higher than the amount observed at the end of 2008. The

change in the stock is explained by net indebtedness of Ps. 257.2 billion, upward adjustments to the inflation indexed debt by Ps. 12.6 billion and an increase in the Federal Government's financial assets by Ps. 103.2 billion.

The stock of the Federal Government's net external debt in July was US\$ 39.3 billion, amount US\$ 1.6 billion higher than the one observed on December 31, 2008. This result is explained by a net amortization of US\$ 1.5 billion and a decrease in financial assets in foreign currency of US\$ 3.1 billion.

The net domestic debt of the Federal Public Sector (Federal Government, PEDBC's and development banks) at the end of July was Ps. 2,483.1 billion, amount Ps. 214.6 billion higher than the stock at the end of 2008, without considering the conversion of PIDIREGAS liabilities by PEMEX. This is due to net domestic borrowing of Ps. 322.1 billion, downward accounting adjustments by Ps. 1.0 billion and an increase in the Public Sector's financial assets by Ps. 106.5 billion.

The Federal Public Sector's net external debt stood at US\$ 29.8 billion, amount that is higher than that observed in December 2008 by US\$ 5.5 billion. This is due to net external borrowing by US\$ 3.0 billion, which does not include the conversion of PIDIREGAS liabilities into PEMEX's direct public debt, as well as downward accounting adjustments by US\$ 5.1 billion and a decrease in foreign financial assets by US\$ 7.6 billion.

The indebtedness as of July is consistent with the authorized deficit for 2009, amount equal to PEMEX's investment during the year.

More details on Public Finance and Public Debt statistics can be obtained in the Ministry of Finance's web page at:
